

BovIntel

Ultrasound reimaged

Bringing fertility into focus for
conception rate success

The future starts here

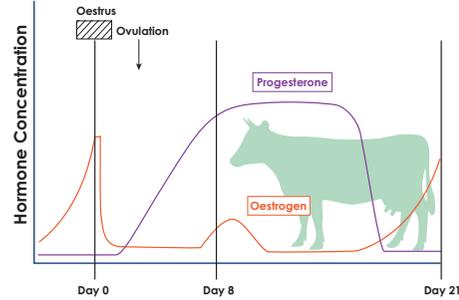

BovIntel

Fertility in Focus

Fertility scanning enables vets to pinpoint where a cow is in her cycle, pre-insemination, and advise on how to achieve conception at the earliest opportunity. Allowing them to identify potential problem cows up to 35 days earlier than a pregnancy scan.

BovIntel brings revolutionary technology onto the farm, to transform the way vets use ultrasound and advise clients.

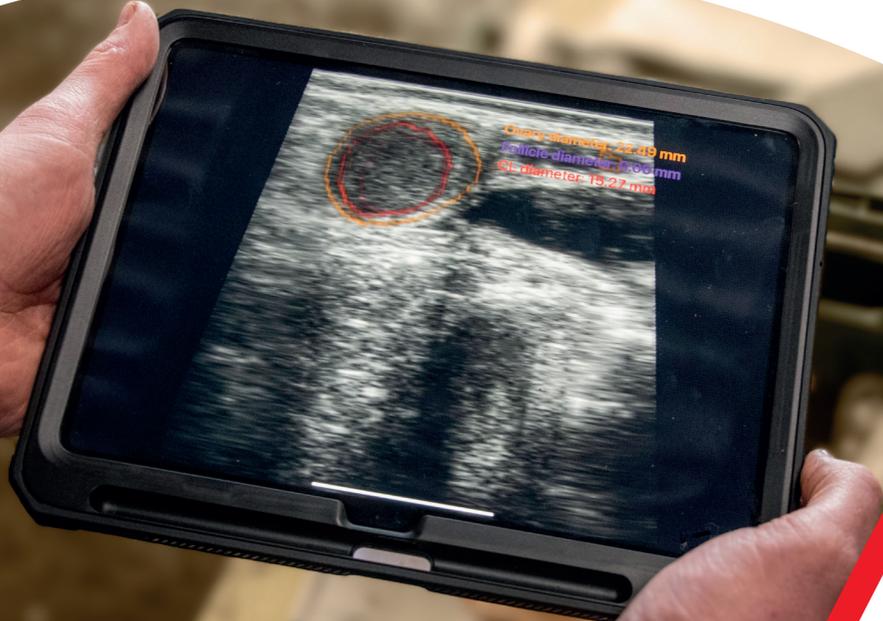

What is BovIntel?

Exclusive to the Easi-Scan:Go, BovIntel is a simple add-on to the Go:Scan app.

As you scan, it will automatically;

- ✓ Identify the Ovary, Corpus Luteum and Follicles on an ultrasound image
- ✓ Highlight and label them in colour on your tablet or BUG:Go screen
- ✓ Take and display precise measurements.

Who benefits from BovIntel?

Fertility focused vets

- Speed up the scanning process on-farm by up to 3 times
- Finetune breeding advice to clients
- Contribute to dairy farm productivity increases

Pregnancy focused vets

- Unlock the benefits of fertility scanning
- Quickly assess fertility status in addition to confirming pregnant/empty cows
- Provide data that informs breeding advice, adding value to your visit

Newly qualified vets

- Equip new vets with fertility scanning skills
- Build confidence in interpreting ultrasound images
- Fast-track new vets to independent practice

Farmers

- Streamlined scanning saves time
- Empower farmers with veterinary insight
- Better results = more productive herds

Easi-Scan:Go users can access a **FREE 30-day trial** of BovIntel via the Go:Scan app.

After your trial, continue using BovIntel on a subscription or pay-as-you-scan basis.
